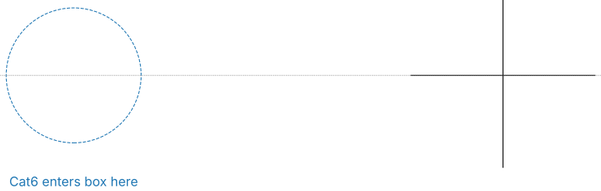
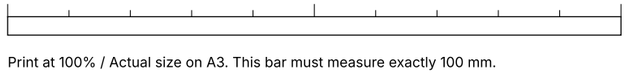
CUT ON SOLID LINE • 343.1 × 221.6 mm • R7 corners (drill Ø14 at the 4 crosses first)



Dashed grey = alu trim outline (covers the cut edge)

Centre the hole between two studs (450 c/c). Max 27 mm off-centre so the clamp arms clear the studs.

Check with a stud finder and look inside before cutting: no cables or pipes in the 55 mm deep box zone.



Print at 100% / Actual size on A3. This bar must measure exactly 100 mm.
